

# **Wann ist bei euch die beste Zeit zum Umtopfen?**

**Beitrag von „Elisalisa“ vom 10. Februar 2019, 10:49**

Hello 😊

1. when repotting, I change the substrate because I found one more suitable

2.I repot when I have time including winter, as for trees in containers;) we can plant anytime, with a preference for the descending moon

3. 45 degrees too

4.I do not defeat the roots more often, and repot: after taking out the plant even if I do not touch the root ball too much I let it dry so that the small lesions of the roots are not in contact with even dry substrate
