

Diskussion zu guten & schlechten Vererbern

Beitrag von „Bravo-CLIA“ vom 9. Juni 2018, 08:05

1) L. winteriana is a wonderful parent. So does her hybrid plants.

2) Gräsers Schönste, Erfolg are very dominant on shape and color.

3) Pseudobivia hybrids are lack of yellow color.

4) L. tigelliana might be a gene pool for very freely flowering.
