

# Vermehrungen vom Herbsttreffen 2019

**Beitrag von „LEM“ vom 3. November 2019, 15:17**

Hello to all. A few years ago I joined the AG for the magazine, of which I appreciate the photos, while the texts remain mostly unknown to me, not knowing German. I honestly don't understand the criticisms of what I wrote above. I don't think I said that people went to the meeting only for the exchange / gift of plants. Simply, since in previous posts we talked about the grafts of the areoles obtained in Regensburg, areoles of recent and interesting hybrids, I wanted to comment positively on this aspect. If in the previous posts we had talked about the relational aspects of the event, I might have written about this. The exchange of ideas, experiences or the simple pleasure of spending a day in the company, do not exclude the additional pleasure of returning home with the plant so much dreamed of. Then, different people will be interested to a different extent in one or the other of things. Personally, not speaking German or English, I would hardly be able to socialize and converse. It is an objective obstacle. As for the fact of living far away is another objective obstacle. Not insuperable, but still an obstacle.

I trust I have explained my thoughts better. As for the term "retabel" I hope that in German it has not only the literal meaning...
