Ho Amadeus,

I could be wrong but it seems that the color palettes identify the various shades with a code, since it is not possible to assign a name to each of them. The color's description with a code is only useful if the reader has the same color palette (NCS, Pantone, RAL, etc.). That said, if you are satisfied with not too large palette, you can also find them on Amazon at lower prices. Have you tried asking a paint shop?

Regards,

Massimo
