

Farbatlas

Beitrag von „Andreash“ vom 4. Januar 2020, 09:25

hi Massimo, this is not wrong, if you take RAL etc. but there must be any Standard in my opinion. If I say the Flower is Magenta red or cherry red? there would be the same Problem. also the Problem is for sure that each Person has a different look at the same Color. what i mean is if I say this is cherry red and you look at this Color maybe you see karmin red. there must be a Standard in this.

I think in the Color Chart in the link, there are names for the Colors (this is Special for Flowers).

I'm also in a Epic Cacti group, the People there work with this Chart for descriptions of the Flower.

best regards,

Andreas
