

Soehrensia x EH

Beitrag von „matteo2g“ vom 17. Mai 2021, 21:30

Thank you Frank! It looks like an echinopsis, isn't it?

Do you know if Soehrensia Formosa or Bruchii can pass their large spheric body when crossed with echinopsis and trichocereus? All of the Soehrensia hybrids I have seen have bodies like trichocereus or sometimes even smaller.

I have just tried crossing my S.Bruchii with Riverside, I was dreaming of a shirt spined large body hybrid however it will probably remain just a dream ☹
