

Keine Knospen an den TH Hybriden

Beitrag von „el48tel“ vom 13. Mai 2022, 17:50

The wind in the winter 2021/22 in England came mainly from the west. Therefore it was not cold enough for Echinopsis. Since the equinox the wind has been from the North. It has been too cold for the buds to develop. They have started to form but progress is very slow.
