

Graser Erfolg

Beitrag von „Katja“ vom 16. Februar 2024, 17:14

SB is an abbreviation of the German Selbstbestäubung = self pollination

WB is the abbreviation for Wildbestäubung = wild pollination (like by bees or so)

From what I understand Gräfers Erfolg x Gräfers Erfolg = Gräfers Erfolg x SB

But if self pollination doesn't work with Gräfers Erfolg then I guess it won't make any difference trying this with a separate plant with the identical DNA - I would still give it a try.... sometimes unexpected things can happen.
