

Variegated Epiphyllums

Contribution by „rudir1962“ on 28. August 2012, 06:07

Hello Stefan -

Matt has and sells some varieties of this Epiphyllum -

Here is a report from him >>

http://www.mattslandscape.com/epiphyllum_virus/

The virus spreads even through insect bites !

I am also thinking about which to order but when one thinks about how big the risk is to lose all originals !! or that it will no longer bloom as it should -

Perhaps this virus is also transferable to TH ????

Also, every Epiphyllum caretaker/breeder who sells cuttings should point out that he has such examples in his collection !!

And you are right - It is with certainty already some examples in circulation and will be passed on -

Da braucht man nur bei Ebay regelmäßig gucken !

Schönen Tag

Grüße Rudi -
