

Echinopsis hybrids with Hildewintera as father?

Beitrag von „hartikos“ vom 26. September 2012, 15:52

Hi morgan,

you read it correctly. Cement is used as an etchant. You're wearing cement dust on the brush on the stigma and wait about an hour. I have myself not tested it yet. I have read some reviews about it. At the Forum meeting in Fulda, last weekend, this topic was also discussed shortly. New for me was the waiting time of about one hour. Next year I will make my first experiments with it.

Regards

Gerhard
