

HDH 2012

Beitrag von „morgan“ vom 3. Oktober 2012, 17:12

They are all interesting crosses, will most probably come many beautiful hybrids from these!

Number 1 is interesting: did you use some special method to cross the PH with an echinopsis? I've never managed to do such a cross? (I might have made one this year though, looks like a fruit is forming on my kermesina which was dusted with pollen from "Gossamer").
