Hello Morgan,

yes, Badisch Gelb II is written on the original label. You are right, the spines from Badisch Gold and Badisch Gelb II are similar. If there is a plant with number 2, I think, there also must be a plant with number 1. Perhaps that's your plant with the short spines. I'm sure, Mr. Wessner can say you more. I also have another Badisch Gelb, but it has not flowered yet, and I can't find it in the glasshouse, because all plants are inside now, for the weather is very bad. It's raining cats and dogs. But that's quite normal for this season here.

Here are the flowers from Badisch Gelb and Badisch Gold
