

Kreuzungsversuch Rebutia x Lobivia

Beitrag von „Revenger“ vom 12. Oktober 2012, 14:56

Hello Matteo!

I'm not really sure if it was a cross or just a part of the stimulus fertilization Lobivia. Now it's wait first how the seedlings compared to the other junction (x L.jajoiana L.densispina "Star of Lorch"), look later times. A fresh grafting I must try, but it's absolutely nothing to it.
