

Herbstimpressionen

Beitrag von „morgan“ vom 12. Oktober 2012, 15:56

Thank you Gaby!

Your photos are fantastic!

These "Badisch" are all beautiful. It seems like there are many different ones. Your "Badisch Gold" also looks a bit different from other photos I've seen.

My "Badisch Gelb" looks like "Naheröschen" in the plant body and spination. Very short spines. I find your "Badisch Gelb" extra beautiful, I will try to find this one too! (I've contacted Wessner but he's not easy to reach through e-mail).

Here's a link to the different "Badisch" available at echinopsis gallery (2 of these 4 photos are yours and 2 are from Wessner):
