[Zitat von Enrico](#)

Hello

Compliment, even if you should not be the first person in China (who knows by a population of more than a billion?) the Flying Saucer shows its flowers.

It seems the Flying Saucer is propagated twice, is this right? On what is it propagated?

You visited my page?:In fact all the photo of Flying Saucer is his,I don not have it.And He has come to here,so I delete the photo.He allows me show his photo on my album.
