Qiyawei, I'm afraid that the online translator doesn't work with my poor German..

the colours in teh pictures are realistic, at least in my monitor!

the MAT02 has no pollen, I had 4 flowers with no pollen. I dusted them with pollen from echinopsis and Indio Magic and this last one is the only fruit I have now.

I have other siblings but I'm afraid they won't bloom until next year.

many greetings,

Matteo
