Flower stem too weak

Beitrag von "LeeAlan" vom 4. September 2013, 20:14

Hello Ernst,

Thank you for your advice.

It is interesting to know it is the mainly the genetics and that it is a common problem. Yes the problem flowers are on the side of the plant.

It is a good suggestion to breed with plants that have better shorter stems.

Much appreciated.

Alan (inUK)

I think, many of us have the same problem, especially with Echinopsis-hybrids.
