

# Winter seedling care advice please

**Beitrag von „Dave\_S“ vom 28. September 2013, 16:42**

Greetings all, I wish to ask advice from you. In the past years I have not had too much luck overwintering young seedlings. Can I ask for good advice how any of you do it?. Mine will be kept in a heated glasshouse (to 6°C). Do you stop watering, or just water a little at times.

Thank you

Dave
