

Own hybrid I call "Stella-Maria"

Beitrag von „morgan“ vom 13. Februar 2014, 00:12

Hi!

Here is a TH that flowered for me last summer (2013). Brought it up by seed but I'm not sure about the crossing (unfortunately I messed up some labels).

It has a filled flower, strong color and broad petals. The flower has a diameter of approx. 18 cm.

I name it "Stella-Maria" after my mother-in-law.

Hope you like it!

Morgan
