

Cold treatment helps flower produce?

Beitrag von „Bravo-CLIA“ vom 14. Juni 2014, 14:17

Hello everyone

firstly, the author permit me to post what he meet.

Can you see the photos?

A 10cm+ Flying Saucer grows in a 800-1000m above sea level area of China.

His soil is made up of many rocks and little soil, from September 2013, he stopped watering it to make sure it can survival the cold winter.

It shocked me as much, maybe let the TH outdoor could be a great help on blooming flowers.
