

Blüten 2015 von HJS

Hello Matteo,

at first Fantastico: it is a breeding from Helmut Eder. In the first time the plant was named as Eder 110.

It is a crossing with Madame Pele x Arabesque. Are you interested?

and the second: you are right - this flower is not Hot Lips. It was the first flower from this plant, bloomed in my greenhouse. I get them as the Schick-Hybride Hot Lips.

? May be it is a Schick-Hybride Icon ? I have 4 pictures from the flower and from now 1 picture from the plant. What do you think?

Best Regards

Hans-Jürgen
