

# LOTOS

**Beitrag von „Bravo-CLIA“ vom 3. April 2016, 12:32**

Hello Siegfried

If the large form you sown? it requires a 35cm round pot to grow.

I hope you can got bloom in your place, it is said very rare in Europe but common to see in China.

I think they will grow well in greenhouse, they loves hot. by the way, during growing season enough but not too much fertilizer, if over fertilized, that will caused some problem. and they loves organic fertilizer in the soil.

Best Regards

Yunhan Zheng
