

Hildewinteras cold hardiness?

Beitrag von „morgan“ vom 19. August 2010, 23:39

Has anyone tried keeping Hildewintera-echinopsis hybrids in a cold winter storage?

Can they take the same temperatures as Trichocereus, lobivias & Echinopsis?

(I think that the limit for low temperatures of storing Ech-hybrids will be approx. - 5 degrees Celsius, what do you think?)
